

**HB 6519**

To whom it may concern:

I am writing to voice my support for HB 6519 and HB 6527. We have the right to know what's in the food we are buying and feeding our families. It's upsetting to see how prevalent GMOs are in our society. There have been numerous studies done citing the negative health implications they have. These bills are doing nothing other than requiring labeling to allow consumers to make educated decisions. There is no reason not to pass these bills.

Thank you for your consideration.
